MATHEMATICS

Author Index—Volume 19 (1995/96)

(The issue number is given in front of the page numbers)

- Bai, Z.**, A class of hybrid algebraic multilevel preconditioning methods (4) 389–399
- Baker, K.R.**, see **Young, D.M.** (3) 375–387
- Bull, J.M.** and **T.L. Freeman**, Parallel globally adaptive algorithms for multi-dimensional integration (1–2) 3–16
- Burrage, K.**, **A. Williams**, **J. Erhel** and **B. Pohl**, The implementation of a Generalized Cross Validation algorithm using deflation techniques for linear systems (1–2) 17–31
- Cano, B.** and **B. García-Archilla**, A generalization to variable stepsizes of Störmer methods for second-order differential equations (4) 401–417
- Cats, G.**, see **Wolters, L.** (1–2) 159–171
- Cullum, J.K.**, Peaks, plateaus, numerical instabilities in a Galerkin minimal residual pair of methods for solving $Ax = b$ (3) 255–278
- Da Cunha, R.D.** and **T. Hopkins**, The Parallel Iterative Methods (PIM) package for the solution of systems of linear equations on parallel computers (1–2) 33–50
- De Nicola, C.**, **G. Pinto** and **R. Tognaccini**, A normal mode stability analysis of multi-block algorithms for the solution of fluid-dynamics equations (4) 419–431
- De Sturler, E.**, Incomplete block LU preconditioners on slightly overlapping subdomains for a massively parallel computer (1–2) 129–146
- De Zeeuw, P.M.**, Development of semi-coarsening techniques (4) 433–465
- Eijkhout, V.**, A library of distributed iterative linear system solvers (3) 359–373
- Erhel, J.**, see **Burrage, K.** (1–2) 17–31
- Freeman, T.L.**, see **Bull, J.M.** (1–2) 3–16
- Freund, R.W.** and **N.M. Nachtigal**, Software for simplified Lanczos and QMR algorithms (3) 319–341
- Gallivan, K.A.**, see **Meier Yang, U.** (3) 287–317
- García-Archilla, B.**, see **Cano, B.** (4) 401–417
- Garcia, S.**, Higher-order incremental unknowns, hierarchical basis, and nonlinear dissipative evolutionary equations (4) 467–494
- Guo, C.-H.**, Incomplete block factorization preconditioning for linear systems arising in the numerical solution of the Helmholtz equation (4) 495–508
- Gustafsson, N.**, see **Wolters, L.** (1–2) 159–171
- Hopkins, T.**, see **da Cunha, R.D.** (1–2) 33–50
- Meier Yang, U.** and **K.A. Gallivan**, A new family of preconditioned iterative solvers for nonsymmetric linear systems (3) 287–317
- Michielse, P.**, Parallel multigrid using PVM (1–2) 63–69
- Nachtigal, N.M.**, see **Freund, R.W.** (3) 319–341
- Neytcheva, M.G.**, Experience in implementing the Algebraic Multilevel Iteration method on a SIMD-type computer (1–2) 71–90
- Nool, M.**, Explicit parallel block Cholesky algorithms on the CRAY APP (1–2) 91–114
- Oosterlee, C.W.**, The convergence of parallel multiblock multigrid methods (1–2) 115–128
- Pinto, G.**, see **de Nicola, C.** (4) 419–431
- Pohl, B.**, see **Burrage, K.** (1–2) 17–31
- Saad, Y.** and **K. Wu**, Design of an iterative solution module for a parallel sparse matrix library (P_SPARSLIB) (3) 343–357
- Schönaier, W.** and **R. Weiss**, An engineering approach to generalized conjugate gradient methods and beyond (3) 175–206
- Sleijpen, G.L.G.** and **H.A. van der Vorst**, An overview of approaches for the stable computation of hybrid BiCG methods (3) 235–254
- Te Riele, H.J.J.** and **H.A. van der Vorst**, Preface (1–2) 1–2
- Tognaccini, R.**, see **de Nicola, C.** (4) 419–431
- Tsynkov, S.V.**, Errata to “An effective numerical technique for solving a special

- class of ordinary difference equations".
Applied Numerical Mathematics 18 (1995)
 489-501 (4) 509
- Van der Vorst, H.A.**, see **te Riele, H.J.J.** (1-2) 1- 2
- Van der Vorst, H.A.**, see **Sleijpen, G.L.G.** (3) 235-254
- Van Gijzen, M.B.**, Large scale finite element
 computations with GMRES-like methods
 on a CRAY Y-MP (1-2) 51- 62
- Veldman, A.E.P.**, see **Verstappen, R.W.C.P.** (1-2) 147-158
- Verstappen, R.W.C.P.** and **A.E.P. Veldman**,
 Direct numerical simulation of turbu-
 lence on a Connection Machine CM-5 (1-2) 147-158
- Walker, H.F.**, Residual smoothing and
 peak/plateau behavior in Krylov sub-
 space methods (3) 279-286
- Weiss, R.**, A theoretical overview of Krylov
 subspace methods (3) 207-233
- Weiss, R.**, see **Schönauer, W.** (3) 175-206
- Wilhelmsson, T.**, see **Wolters, L.** (1-2) 159-171
- Williams, A.**, see **Burrage, K.** (1-2) 17- 31
- Wolters, L.**, **G. Cats**, **N. Gustafsson** and **T.**
Wilhelmsson, Data-parallel numerical
 methods in a weather forecast model (1-2) 159-171
- Wu, K.**, see **Saad, Y.** (3) 343-357
- Xiao, S.**, see **Young, D.M.** (3) 375-387
- Young, D.M.**, **S. Xiao** and **K.R. Baker**, Peri-
 odically generated iterative methods for
 solving elliptic equations (3) 375-387
